Subject: Canceled: NWRI Panel for SCVWD Potable Reuse Program
Location: SCVWD, 5700 Almaden Expressway, San Jose
Start: 10/12/2018 3:00:00 PM
End: 10/12/2018 9:00:00 PM
Show Time As: Free
Importance: High
Recurrence: (none)

Santa Clara Valley Water District has requested to **postpone the NWRI Panel meeting scheduled for October 12**. The target meeting date is now June 2019. This District is experiencing delays with developing collaborative legal agreements with wastewater partners and has refocused attention on the Countywide Water Reuse Master Planning while delaying implementation the purified water program. The District identified the following information they plan to develop in time for the Panel to review prior to June 2019:

1. Complete TOC analysis and TM (the Panel recommended back in 2016 to further explore this issue)
2. TOC comparison study with the new RO membranes which will be installed in Nov 2018 at AWPC
3. South Bay Hydrodynamic Modeling Study and Report (this was delayed, and the completion date is currently scheduled for Feb/Mar 2019)

4. Permitting and regulatory deliverables for Palo Alto and Sunnyvale completed after Nov 2018
5. Additional detail on the Trojan UV/AOP project
6. Further design considerations and details will be available as part of the CWRMP alternatives analysis
7. Time to draft a cohesive outreach effort and developments of the bottling of purified water and UV/AOP validation
8. Additional research information for the ROC management wetlands pilot

NWRI apologizes for any inconvenience this schedule change may cause you. The meeting will be rescheduled once the District is more certain of its time line for completing the studies and design work listed above. Best regards,

Suzanne Sharkey
